

Deepika Limbu

Front-End Developer

Calgary, Alberta, Canada (825) 994-2776 dlimbu.dev@gmail.com [\[LinkedIn\]](#) [\[GitHub\]](#)

PROFESSIONAL SUMMARY

Detail-oriented Front-End Developer with over two years of hands-on experience building responsive, user-focused web applications using JavaScript (ES6+), HTML5, CSS3, and jQuery. Strong background in developing real-world projects including fitness tracking, weather dashboards, and task management tools, with proven ability to implement asynchronous programming, and manage application state effectively. Certified in Front-End Development from the University of Calgary, with advanced training in modern JavaScript, OOP, and DOM manipulation. Passionate about writing maintainable code, optimizing user experience, and continuously learning emerging front-end technologies.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3.
- **Libraries & Frameworks:** React, Bootstrap 5, jQuery.
- **Technical Concepts:** React Hooks (useState, useEffect), Component-Based Architecture, REST APIs (Fetch/JSON), DOM Manipulation, Asynchronous Programming.
- **Tools & Build Systems:** Git, GitHub, Babel, NPM, Parcel/Webpack, Netlify.

PROJECTS

Personal Portfolio Website | [GitHub](#) | [Live Demo](#)

- Built a fully responsive portfolio using React and modern CSS to showcase projects and technical skills.
- Implemented component-based architecture and interactive UI elements to enhance user experience.
- Ensured cross-browser compatibility and responsive design across mobile, tablet, and desktop devices.
- Optimized asset handling and deployed the application using GitHub Pages for production.

Real-Time Weather Dashboard | [GitHub](#) | [Live Demo](#)

- Implemented OpenWeather REST API integration to provide real-time weather information for global locations.
- Integrated Recharts to render dynamic 24-hour forecast gradients and implemented a local Storage backed search history to persist user data across sessions. Designed a mobile-responsive interface using CSS Flexbox and Grid, ensuring compatibility across all device sizes.
- Implemented dynamic city search, unit conversion (Celsius/Fahrenheit).

Personal Task Management Tool (To-Do List) | [GitHub](#) | [Live Demo](#)

- Built a functional productivity app focusing on CRUD operations (Create, Read, Update, Delete) and state management.
- Added drag-and-drop task reordering with smooth visual feedback using the HTML5 Drag & Drop API.
- Implemented dynamic category-based forms (Grocery, Education, General) with validation and conditional fields.
- Applied clean HTML5 and CSS3 standards to achieve a modern, accessible user interface.

EDUCATION & CERTIFICATION

Tribhuvan University | *Bachelor of Arts* | Kathmandu, Nepal | 2014

- Completed undergraduate studies with a broad foundation in humanities and analytical thinking.

Xi'an Jiaotong University | *Master of Arts* | Xi'an, China | 2017

- Cultivated research skills, language proficiency, facilitating the dissection of complex linguistic structures and cross-cultural communication.

Independent Study | *Self-Taught Web Development* | 2023 – Present

- Front-End Developer with hands-on experience building responsive, user-focused web applications using JavaScript (ES6+), HTML5, CSS3, and React. Developed multiple real-world projects including a portfolio website, weather dashboard, and task management tools.

University of Calgary | *Front-End Web Development* | 2025

- Core Coursework: ICT 580 (HTML5/CSS3), ICT 581 (jQuery), ICT 442 (JavaScript and the DOM), ICT 443 (Advanced JavaScript).

Udemy | *The Complete JavaScript Course 2025: From Zero to Expert!* | 2025

- Completed 71 hours of intensive training covering ES6+, OOP, and Functional Programming.
- Developed a deep understanding of Application Architecture and clean code principles.
- Mastered advanced concepts: The Call Stack, Event Loop, Promises, and Async/Await.
